DETAILED ACTION

Receipt is acknowledged of the election filed 10/08/03.

Election/Restrictions

Applicant's election without traverse of Group I in Paper No. 4 is acknowledged.

Claims 23-59 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 4.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000.

Art Unit: 1615

Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-3, 5, 7-9 11-13, and 22 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Reid et al.

Reid et al disclose a composition comprising a probiotic and prebiotic composition (see pages 3-9 of the specification). Bifidobacteria as well as Lactobacillus are specifically disclosed. In addition, mucopolysaccharides such as agar page 9, paragraph [0046] are disclosed for use in the composition. Capsule and tablet formulations are disclosed at page 8, paragraph [0042]. The drying and agglomeration of particles of a composition are inherent to any tableting process, and is therefore anticipated by the Reid et al reference. The instant invention is clearly anticipated by Reid et al.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 18-21 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for a method of introducing the claimed composition via an enteral feeding tube, does not reasonably provide enablement for introducing the claimed composition by any other method. The specification does not enable any

Art Unit: 1615

person skilled in the art to which it pertains, or with which it is most nearly connected, to introduce the claimed composition directly into the gastrointestinal tract by any other invention commensurate in scope with these claims. Applicant has disclosed the direct delivery of the claimed composition by various tubes disclosed at pages 16-18. While tablets and capsules are also disclosed at page 18, this is not a "direct" delivery as it must pass through the length of the gastrointestinal tract before delivering its bioactive.

Claims 4, 6, 10, 14-17 are objected to as dependent upon a rejected base claim.
